

COMPANY PROFILE

About Us

LA TREVE Group PTY LTD was founded in 2015 in South Africa to work in supply chain management and civil engineering. With the growing demand for engineering services in DRC, LA TREVE GROUP began to work with certain companies in DRC From 2017 before officially registering in April 2020 LA TREVE SARL.

LA TREVE SARL is a 100% Congolese company and registered with ARSP.

Who we are

LA TREVE SARL has committed to :

Achieve sustainable and profitable growth; provide services that meet the needs ,expectations and standards of our customers.

- Attest high quality services to our existing and potential clients.
- Assure that the quality policy is the main concern of all LA TREVE staff.

Mission

Providing services to our clients with a highly professional and project management team which will strengthens our position in the market.

Core Values

OUR PRODUCTS AND SERVICES

Mechanical Part

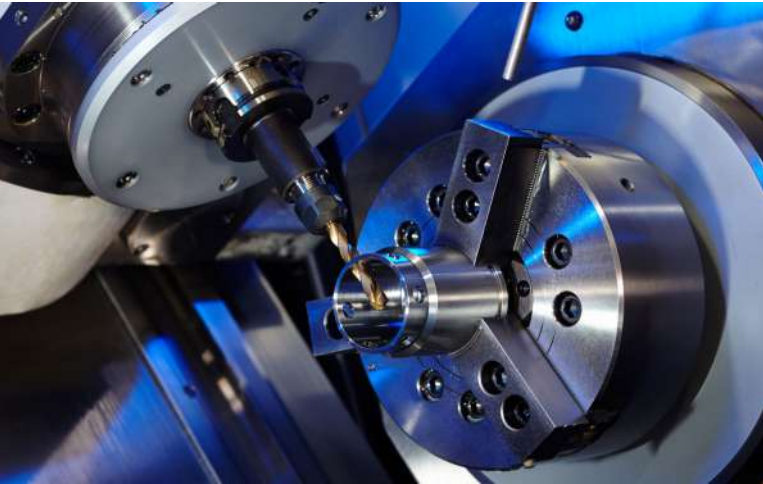

We supply different types of mining and industrial tools (mechanical, pneumatic, hydraulic and electrical).

From drilling to production tools in the mining sector as well as all process and construction tools.

Industrial and Mining Solutions

Ranging from drilling to production tools including all process and construction tools .We supply a huge range of underground ,surface operational equipment's and infrastructures.

Structural Fabrication

- Plate developments
- Structural staircases, walkaways
- General Purpose Fabrication

Process Welding

- GTAW/TIG
- SMAW/MMA
- GMAW/MIG/MAG
- SAW
- HDPE

Mechanical Services

- Valve refurbishments
- Laser, Gauge alignments, etc.

Site Mechanical Services

- Flange alignment
- Equipment and equipment testing
- Flange torque commissioning

Civil Works and Services

- Piping erection/installation & positioning welding
- Tanks
- Structural platforms
- Installation of mechanical equipment
- Surveying & inspection
- Hydro testing, etc.
- Civil and electrical works

Process Systems

- HVAC systems
- Stream tracing, etc.

Screening Solutions

We provide screens and sieves below:

- Vibrating screens
- Normal screens
- Polyurethane screens
- The different spare parts

Pumps, Compressors, Generators

Grindex Drainage Pumps

LA TREVE is the exclusive agent for these products in the DRC.

Grindex drainage pumps

Choose when pumping:

- Water and abrasive solids: up to 12mm
- Ground water, raw water or spillage water
- Fluids with pH values from 5 to 8

Grindex sludge pumps

Choose when pumping:

- Water and abrasive solids: up to 12mm
- Ground water, raw water or spillage water
- Fluids with pH values from 5 to 8

Grindex stainless steel pumps (Inox)

Choose when pumping:

- Corrosive fluids in harsh environments with solids up to 80mm
- Fluids with pH values from 2 to 10

Grindex slurry pumps (Bravo)

Choose when pumping:

- In abrasive applications requiring pumps with very high durability: quarries, mines, dredging, settings ponds
- Fluids with pH values from 5.5 to 14
- Solids handling up to 40mm

Primo, highly compact drainage and sludge pumps (up to 0.8kW)

LATTY INTERNATIONAL PRODUCTS

Latty international products are essential to provide sealing efficiency in complex industrial process. The added value- quality of raw materials and long operational life- allow our customers to significantly reduce their release of gases into the atmosphere, preserve safety and the environment, reduce maintenance costs and lengthen the life of their production system in the industries such as food-processing, chemicals and petrochemical, energy, etc.

EagleBurgmann®
Rely on excellence

We supply Cyclones and Mechanical seals from EagleBurgmann.

SPIROTECH

With over 40 years' experience in the Engineering and Mining sectors, Spirotech International Pty (Ltd) is La Treve Sarl preferred partner for mine ventilation solutions.

The full range of ventilation products available including:

- High-pressure ventilation doors
- ventilation ducting
- ventilation bends
- silencers
- protection pieces
- blast sprays
- rectangular ducting
- flexible PVC force and exhaust ducting
- polypropylene ventilation curtains and brattices
-

Spirotech also manufacture fully automated high pressure and low-pressure ventilation doors and have also designed and developed an emergency toilet for the underground refuge chambers. Spirotech have manufactured and successfully commissioned over 100 automated ventilation doors and have an extremely strong track record in this field. In some cases, the doors have done over 25 000 operations with minimal maintenance.

SPIROTECH

RGR TECHNOLOGIES

RGR Technologies is an industry leader in the design and manufacture of metal and soft-seated, high-pressure trunnion and floating ball valves and check valves for oil and gas, petrochemical, mining and utilities and paper and pulp industries. RGR valves are energy efficient, maintain safety and ensure constant productivity even under the most grueling process conditions. Expertise in tailor-making solutions that include trunnion, floating ball and check valves in various configurations as well as valve automation packages.

STEELCOR

Steelcor is a specialist manufacturer of Transformers and Miniature Substations. With over 30 years of experience, the full range of Steelcor products available including

- Miniature Substations
- Transformers
- Switchboards
- Switching Substations
- Cable Clamps

Steelcor manufactures oil and air-cooled transformers from 10 to 4 000 kVA and having a primary voltage of up to 33 000 volts. The majority of our air-cooled class H transformers are supplied in IP55 enclosures with a heat exchange for cooling so that the outside air does not come into contact with the core and coils.

Steelcor have been pioneers in manufacturing and supplying transformers filled with natural biodegradable, fire retardant Ester Oil.
